Eve's and Lola's kitchen hour!

We are going to show you one of our favourite recipes.

Let's get started!

Sugar cookies

100g unsalted butter, softened

100g caster sugar

2 eggs

1tsp vanilla extract

30g cornflour

300g plain flour

Method

STEP 1

Beat the butter and sugar with an electric **whisk** for 4 mins until light and fluffy. Beat in the eggs, one at a time, then add the vanilla. Whisk in the cornflour and plain flour until the mixture comes together into a dough. Put the dough between two pieces of baking parchment, and roll out to a 6mm thickness using a **rolling pin**. Chill for 30 mins.

STEP 2

Heat the oven to 200C/180C fan/gas 6. Peel the top layer of parchment off the dough and stamp out circles using a 6cm round cutter (or the shape of your choice). Re-roll any offcuts and continue stamping out rounds until all the dough is used. Transfer the cookies to a second large baking sheet lined with baking parchment, spacing them 2cm apart (you may need two sheets). Bake for 7-10 mins. Leave to cool on the sheet for 15 mins, then transfer to a **wire rack** to cool completely.

Will keep in an airtight container for one week.

Kingdom Animalia!

By Adelina L.

Amazing Animal Facts!

Star of the Issue!

The Axolotl!

Axolotl, cute, weird, amazing and always seeming to put a smile on people's faces. These tiny sea monsters were first found in several lakes, such as Lake Xochimilco. An adult Axolotl usually grows from 15-45 cm long, and come from the family of Salamanders.

Sadly, these half-aquatic creatures are Critically Endangered, and scientists think there are less than 1000 of them left in the wild.
